# FROM OUR VICE-PRINCIPAL DESK

Dear Parent,

Albert Einstein said, “Education is not about learning of facts but training young minds to think.” We at Radiant School, works towards holistic development of our students by providing them the tools and experiences that encourage our students to think. The aim is to create empowered minds so that students are able to decide what is good for them, differentiate between right and wrong, choose opportunities that help build them up and enable them to live in harmony with all existence. As the new Vice Principal, I am delighted that the school’s values align with my own personal values, including the importance of trust, respect, innovation and a sense of community.

We as a team of dedicated staff and teachers committed for the welfare and progress of the children. We believe children need to understand the importance of emotional balance and critical thinking! We believe in empowering our children in such a manner that they act as representatives of a meaningful and value-based society!

Lets imbibe the love of nation, respect for fellow beings, treating all with equality.

Lets guide and realize the young ones forward, our responsibilities are nurturing their curiosity, igniting their minds to pierce the skies, helping them to discover the world of books and richness of experience, ponder on the “mystery of birds in the sky, the bees in the sun, the flowers on a green hill”, and master the magic of technology.

Science exhibitions play an important role in encouraging students to be inquisitive and think analytically. They ignite curiosity and offer chances for students to engage in inquiry-based learning. It allows them to explore hypotheses and find answers on their own.

Exhibitions are a great opportunity for exhibitors to connect with prospects through face-to-face communication and engagement, rather than through cold calls or emails. As an exhibitor, you can interact with attendees to inform them of your company, its offers and its value in a more relaxed and personal atmosphere.

**‘We the UAE 2031’** vision represents a national plan through which the UAE will continue its development path for the next 10 years, with focus on social, economic, investment and development aspects.
